**AGITA®**

**Say goodbye to flies**

## PROFESSIONAL QUALITY FLY AND LITTER BEETLE CONTROL

### Powerful, Fast Acting Results

AGITA® fly bait contains Thiamethoxam, a powerful adulticide that kills 100 % of flies within a 2 m radius of the bait.

### Flies Can't Resist AGITA®

AGITA® is not only fatally attractive to flies and 100 % potent, thanks to a perfectly balanced formula, but it is also blessed with two excellent formulations that are designed to work harder and longer delivering excellent residual control of fly populations.

Ingredient	Benefit
Thiamethoxam	100 % knockdown poison
Tricosene	Pheromone attractant
Lactose sugars	Food attractant
Crystalline sugars	Food attractant

### Easy Application With 2 Versatile Formulations

- AGITA® 1 GB bait formulation**  
AGITA®'s bait formulation is innovative and unique. All the constituent elements in AGITA®'s formula are evenly distributed in a matrix within the granules.

So, unlike conventional bait formulations, AGITA® bait continues to attract and kill flies with the same efficiency for as long as the bait lasts.

- AGITA® 10 WG paint and spray formulation**  
AGITA®'s dust free granulated 10 WG formulation containing 10 % thiamethoxam dissolves readily to form a milky broth suspension for easy paint or spray application.
